

## Real-time driver safety for your employees

Because every second counts.

### Phone distraction

Leading cause of crash frequency.

### Speeding

Leading cause of crash severity.

## LifeSaver Mobile

Innovative solution to help you curb both, proactively.

## Want their eyes on the road?

### Block their screen.

LifeSaver Mobile's distracted driving solution puts a stop to onboard cell phone usage before it starts. This easy-to-use software prevents drivers from using their phones illegally while their vehicles are moving and reports back to you if they try. It's affordable, highly visible and non-invasive. No beacons, dongles or other infringements on your driver's autonomy or productivity.

## Want them to slow down?

### Warn them verbally.

LifeSaver Mobile's simplified approach to fleet safety takes aim at a second driver temptation—speeding. The platform's verbal warning system reminds your drivers to slow down and notifies them when they've committed a speeding infraction, proactively changing dangerous behavior during the drive. It's an efficient, effective way to deploy speed management across your fleet, improve driver safety and protect your company against rising insurance and liability costs.

# Four ways LifeSaver Mobile improves fleet safety.

## Timing is everything

LifeSaver Mobile allows you to stop unsafe driving behavior in real time. Don't wait for a single phone distraction during the drive to wreck your company's reputation. Block it, instead.

## Simple and Affordable

Distracted driving creates hazardous situations that cost your company money. LifeSaver Mobile's safe driving software is cost-effective and easy-to-deploy, with no expensive hardware required, providing your company with a significant Return On Investment.

## Greater visibility

If a pattern of unsafe driver behavior is detected, LifeSaver Mobile's exception-based reporting provides a low-effort way to manage your drivers. Daily reports to your drivers and your managers encourage a culture of safety collaboration, improving feedback loops and mitigating risk by allowing you to take action swiftly.

## No one size fits all

A company's fleet safety policy should reflect its corporate values. The LifeSaver Mobile platform makes it happen, allowing you to tailor your restrictions to match your corporate policies, customizing warnings messages, violation messages, and more.

## No solution like it. No time to lose.

Phone distraction and speeding are the two biggest risk factors of driver safety. Don't let either be your company's blind spot. Choose LifeSaver Mobile's just-in-time fleet safety solution and keep your drivers' focus where it needs to be—on the road.

It's about protecting your drivers. It's about protecting your company's reputation.  
**It's about time.**

**No beacons • No dongles • No hassles**
