

Companion+ Telematics

Utilizing your existing data

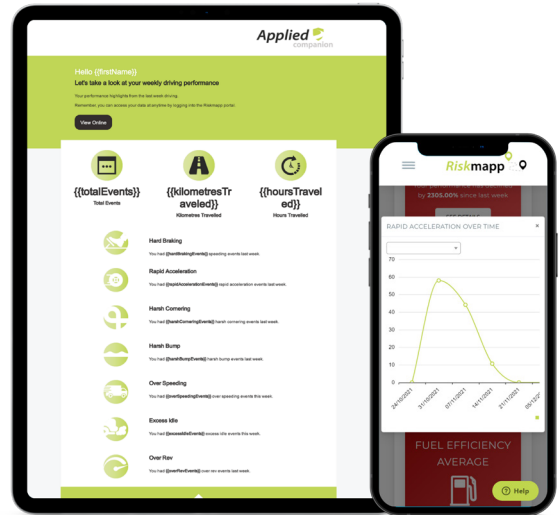

It can be time consuming and costly for organizations to make meaningful use of their telematics data streams. Companion+ Telematics has been designed to automate this process.

DRIVING DOWN RISK

How it works

Companion+ Telematics integrates with telematics providers to receive driver data. From there, it automatically provides supportive actions to only the drivers who need it, all without manager intervention.

- ✓ Free's up resources
- ✓ Reduced administrative tasks
- ✓ No manager involvements
- ✓ Increased data for positive change

Benefits

Companion+ does more than just drive down risk:

No Administrative Burden

Improved Fuel Consumption

Reduced Incident Costs

Increased Safety

Reduced Lost Time Injuries

54% Reduction in Total Average Reduction

Client Pilot Results: 2022

83% Reduction in Rapid Acceleration

30% Reduction in Speeding

53% Reduction in Hard Braking

50% Reduction in Harsh Cornering

Triggered Training™

Knowing where your drivers are at risk is only useful if you have a consistent way to mitigate it. Triggered Training™ automatically shares supportive training reminders to drivers when and where they need it most.

How does it work?

Triggered Training™ is comprised of training videos, modules and messages aimed to help support driver's safety.

In response to driving performance, users may be issued Triggered Training and/or safety messages.

If at-risk driving is detected, either may be sent to the user to encourage positive driving behavior.

Training is supportive – there is no pass or fail and works with messaging to reinforce good driving choices.

Motivate & Reward Drivers

Use league tables, performance changes and scores/rank to encourage participating, learning and motivate lasting change. Provide incentives for drivers such as a reward for the most improved driver. This could be on a weekly, monthly or quarterly basis and per event type or overall.

Types of Interventions

Triggers will utilize a blend of:

- Safety messaging
- Safety videos
- Online modules
- Line manager/senior stakeholder escalation

Threshold Setting

We work closely with clients to create pre-agreed thresholds for Triggered Training™. These can be customized to link to internal processes where escalations occur, e.g. linked to disciplinary procedures.
