

# WHIP AROUND+ VERIZON CONNECT

## Integrate with Verizon Connect

### Surface important information where needed

Our two-way Verizon Connect integration makes it easy to sync vehicles, and capture mileage and location data within Whip Around without breaking your existing workflows.

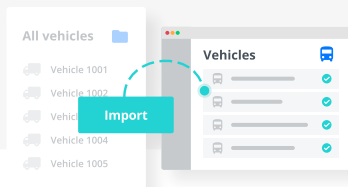

### Keep your vehicle details in sync

As you manage your vehicle data in Whip Around for things like year, make and model - we keep Verizon Reveal up to date automatically, so you only have to make these changes in one place.

#### #TIMESAVING

### Import your vehicles

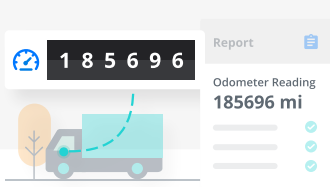

Save time by automatically importing all of your vehicles from one solution and have them connect and share data.

#### #RELIABLE

### Record mileage accurately

Automatically record mileage from Verizon Reveal and save this against every Whip Around report.

#### #SYNCHRONIZE

### Track your vehicles

Sync mileage and GPS location data between the two systems to gain confidence across your fleet.
