## APPROACH TRAINING COMPREHENSIVELY

> **Scheduled Training**

Automatically assign and schedule training – from new hire orientation, certification and license renewal training to recurring safety and skills training. Training can be assigned by division, region, location, job title or even a custom group.

> **Remedial Training**

Automatically assign event and trend-triggered training, where individual or groups of employees are assigned corrective courses based on telematics and MVR alerts that work to immediately remediate unsafe driving behavior.

> **Insights and Reporting**

Keep employee data organized and record success with our customizable reporting tool, featuring a comprehensive dashboard, compliance reporting and certificates of completion.
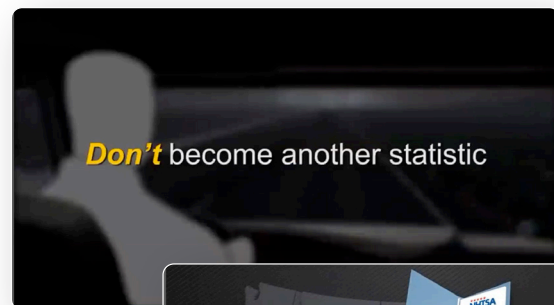

TRAIN ANYTIME, ANYWHERE

SambaSafety gives your users the flexibility to undergo training anytime, anywhere using their PCs, tablets, or even smartphones via our comprehensive mobile app. Assigned courses are all easily accessible, with cloud-based hosting for 24/7 availability. Lesson starts, progress and completion data are all instantly recorded in the LMS, so employees won't lose their place if they switch to a different device mid-lesson.

GAIN SUPPORT FROM OUR SOLUTIONS EXPERTS

Whether you're in need of engineering services to connect your custom, company-specific training or you're looking to leverage our catalog of over 300 safety training courses, SambaSafety provides unmatched value, insight and performance to your employee training program.
