

**GAIN TRANSPARENCY  
INTO YOUR FLEET'S  
DRIVING HABITS TO  
IMPROVE SAFETY,  
AVOID ACCIDENTS AND  
RELATED EXPENSES**

## ENHANCE FLEET SAFETY WITH LOW-COST TELEMATICS

**Smartphone-based telematics** automatically analyzes the fleet's driving habits and creates self-awareness of high risk driving behaviors.

Fleet Manager portal **analyzes driving behavior data** and visualizes current safety levels, identify safe drivers, and those who may need additional training.

Solution also includes features for **better fleet operations** like Location Monitor, Log Books, Notifications, Report Accident, and Safety Campaigns.

Solution is available as a **subscription-service** with a standard configurations, or as a **private deployment** for branding, integrations, and customizations.

**XEMPLAR DRIVE** is a low-cost smartphone based telematics solution that leverages mobile, cloud, and web technology, enabling commercial fleets of all sizes to detect and address high-risk driving behaviors that could hurt fleet operations and profitability. For drivers, the mobile app provides deep insights into their driving habits and creates awareness of their day-to-day driving risks. For fleet owners/managers, Xemplar Drive serves as an effective tool to positively promote a safety culture by delivering actionable feedback to drivers and motivate them to improve their habits to increase overall safety.

Role based web portals allow fleet owners, administrators, and authorized parties to review key safety metrics and drill-down to individual drivers or specific trips. With over 50 graphs, reports, and fleet management functions, the web portals empower fleets to gain transparency into driver safety and create enforceable safety policies and programs.

## Risk Detection

- Enable **24/7 monitoring** or driver-specific **business hours** (managed by the driver or system)
- **Automatic trip detection** and recording based on motion- sensing.
- Gather accurate and **real-time trip data** with start/ end times, routes, mileage, events, etc.
- Analyze trips and **provide feedback** on trips as they are completed.
- Individual behavior stats for **self-analysis** and improvement
- Real-time **traffic alerts** based on current locations

## Risk Management

- Fleet Manager web portal to **analyze driving data** across multiple dimensions with real driving data
- Drill-down to **individual driver profiles** and trips to identify high- risk areas for corrective actions.
- Design and launch safety campaigns to **motivate safer driving** with rewards.
- Identify **training needs** to enhance safety and prevent risk
- Ability to create a **geo-fence** for individual drivers with real-time alerts
- Provide data access to **relevant 3rd parties** for additional services

## Fleet Services

- Digital **ID Cards** and policy information
- Built-in **Report Accident** feature to collect photos, video, etc. at the scene for insurance claims
- **Last known driving location** of drivers and their vehicles.
- **High risk trip alerts** as soon as drivers complete them.
- Automated **daily logs** showing trips data, routes, and stopped locations.
- Send **in-app notification** messages and alerts to drivers in the field

## ABOUT US

Our journey began in early 2015 while experimenting with smartphone technology to analyze motion patterns that led us to develop an innovative and economical smartphone telematics solution for loss containment. We then extended our capabilities to include numerous new features including policy and claim services, and developed turn-key solutions for Personal and Commercial P&C Insurers. Today, Xemplar is an established digital solutions company that offers both pre-configured and tailor-made solutions to insurers and commercial businesses, with many companies using our products and services to drive their digital transformation.

## OUR PARTNERSHIPS

We are creating a strong and growing network of strategic partners offering complementary products and services to meet unique needs of our customers. Please visit our website for further details.
