MARKET LEADER IN INDUSTRIAL EQUIPMENT
MANAGEMENT

COMPANIES **TRUST** US

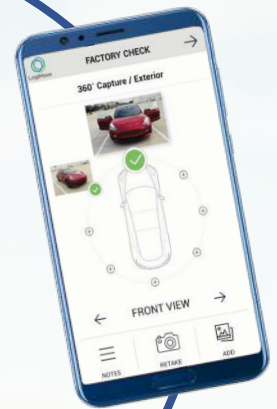

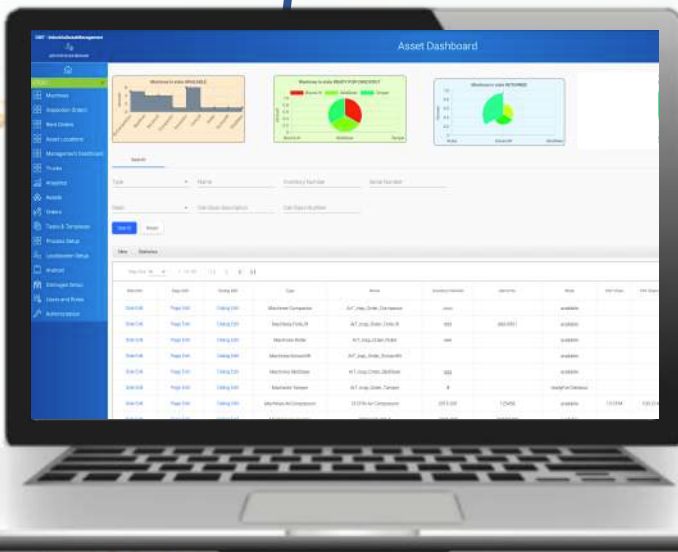

Join the Workflow Movement

PROCESS PLATFORM CM7

Our goal is to collect all your tasks and processes in a single, highly customizable platform. No coding is required to create mobile workflow apps for your needs within minutes. With our dynamic platform, real time data is sent to a central dashboard. Utilizing our mobility solution you will digitally transform your business.

**INSTANT VISIBILITY
IN THE BROWSER**

**LIVE DATA INPUT
FROM THE FIELD**

↑ 21%
Revenues

↑ 36%
Customer Satisfaction

↓ 14%
Costs

PROCESS PLATFORM CM7

This low code solution allows you to configure your workflow and implement a scalable in a couple of weeks!

Step 1

Create your app in **CM7**, using only **Drag&Drop** operations. Customize processes, asset flows and orders based on your needs.

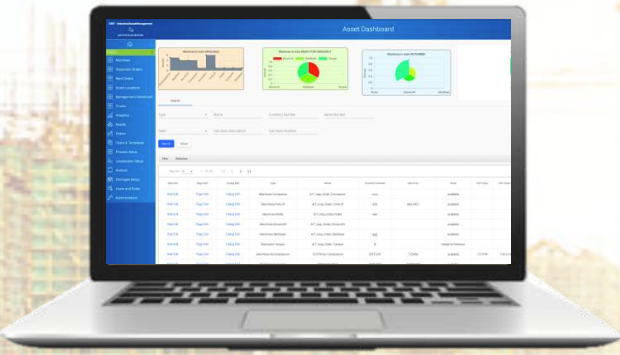

Step 2

See the created **workflow** on your **smartphone** within **CM7** mobile app. Control devices and permissions with a single click from your browser.

Step 3

Monitor all your workflows from **CM7** dashboard in your web browser. Get **live updates** and react to the dynamically changing industry.

“CheckMobile's process-based approach and low-code generation delivered **very quickly a good foundation for our business.**”

- **Marc-Stephan Heinsen**
Vice President Operations,
Lekkerland Deutschland GmbH & Co. KG

AI-Damage Detection~ Industry First Solution

CM7 has a Damage Detection and a guided damaged detection workflow module. This tool **guides** the field worker with a pictogram to take specific pictures and drop-down screens will appear with damage components and even **pricing calculation**. AI damage detection is layered on comparing the before and after photos and detecting specific damages as well as dirt levels. **This can be done with vehicles and construction equipment.**

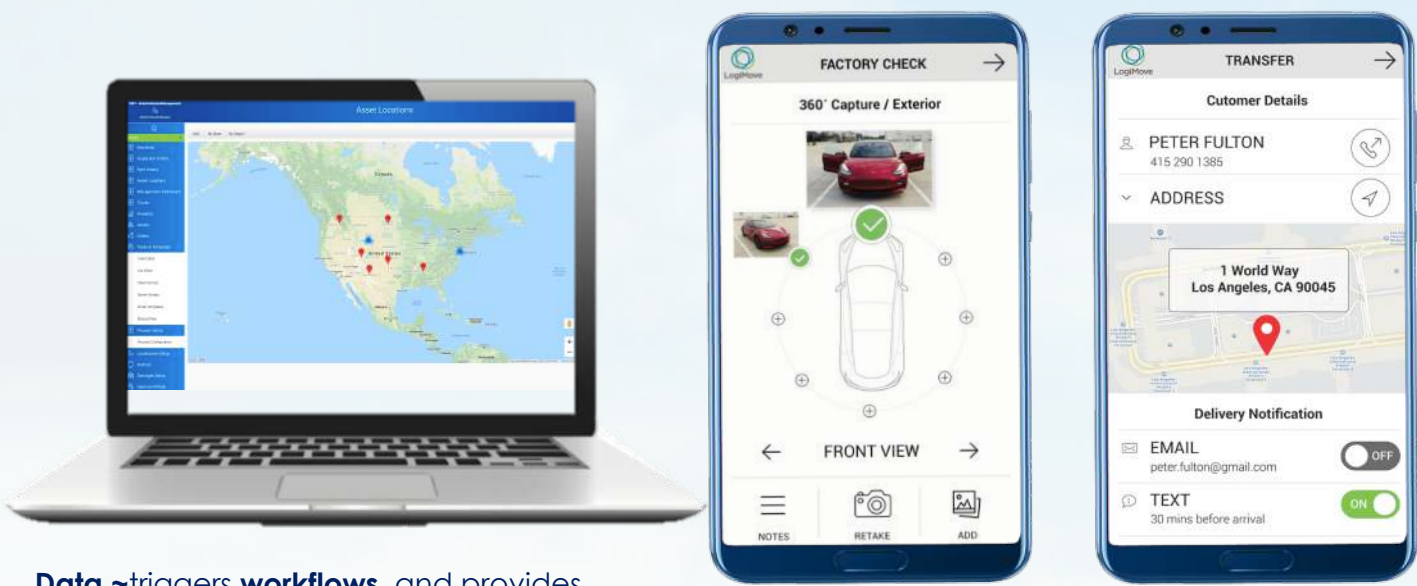

**DAMAGE
DETECTION HAS
NEVER BEEN EASIER**

↑ **37%**
Damage Detection

↑ **34%**
Damage Collection

Take control over your processes with **CM7** and don't miss a single opportunity to continuously improve your business.

Data ~triggers **workflows**, and provides accurate, real time actionable insight on how to streamline your business and enhance the **customer experience!**

Cloud Technology for safer, faster and leaner processes, compatible with your **ERP system**

Success Story from the Industry

Situation Before:

Standardized and paper-based process for thousands of different assets and models of heavy equipment machinery which is sold, delivered, rented and stored in facilities worldwide.

Our Solution:

RFID tagging of all devices, individual mobile apps for each device with asset specific checklists; damage and condition history, as well as asset specific maintenance procedures. Integration of AI damage detection software through utilizing hardware internal camera features.

Benefits:

The User Experience and on-boarding process for field workers were drastically improved which resulted in significant cost reductions. Labor expenses decreased by 15%.

A construction worker wearing a white hard hat and a high-visibility vest is seen from the back, looking at a tablet. The background shows a large construction site with multiple buildings under construction, cranes, and scaffolding under a bright sky.
