

An aerial photograph of a large container yard filled with numerous colorful shipping containers and trailers arranged in neat rows. An orange banner is overlaid on the left side of the image.

# Trailer & Container Management

Global connectivity to remote assets are critical to long-haul carriers and transporters of valuable cargo. The ability to have a high degree of visibility and access to remote assets from anywhere helps transporters increase operational efficiencies, decrease costs, reduce liability, and comply with government regulations. Learn how AssetLink Global's products and services can help you deliver value in the transportation industry by connecting your powered or unpowered container and trailer assets.

## Optimize Utilization and Gain Complete Trailer Visibility

- Gain visibility of your entire fleet with global two-way communications
- Reduce dwell times and improve tractor-to-trailer ratio
- Automate delivery confirmation and timing of delivery for billing

## Improve Preventative Maintenance

- Increase efficiency by proactively scheduling preventative trailer maintenance
- Track miles driven and engine hours in real time to monitor if a trailer is over or underutilized

## Help Prevent Trailer Theft and Unauthorized Use

- Use on-board geofences to track location of trailer inventory
- Use sensors to detect and receive alerts when trailer doors open outside set parameters, detect fuel theft, cargo status load, trailer temperature, tire pressure and more
- Identify irregularities to allocate liability to the appropriate party

Provide the global asset visibility needed to maximize operational efficiency, optimize asset utilization and increase your bottom line without in-house development

## AssetPack™

**Solar-powered, ruggedized, global, two-way asset tracking and sensor gateway for unpowered and powered assets.**

### EXPERIENCE ROBUST FLEXIBILITY

Enabling simple to advanced transportation applications

- Track location of trailers, containers and railcars
- Monitor doors to detect theft and ensure cargo security from origin to destination with configurable business logic
- Monitor trailer, container, railcar temperature
- Receive immediate alerts upon entering and exiting a location with on-board geofencing and motion sensing for delivery confirmation
- Multiple installation options – installs on almost any asset in minutes

### BENEFITS OF AN ASSETLINK SOLUTION

Never change a battery, never a dead spot, for the life of your asset

- Truly global connectivity for uninterrupted management of equipment and remote programming anywhere in the world
- 10 year, solar rechargeable battery
- Fully configurable IOs
- Intelligent on board business logic
- Integration ready with published API
- One device for multiple market applications

**FIND OUT WHAT ELSE  
ASSETLINK CAN DO FOR YOU**

### AVAILABLE ACCESSORIES

- Engine run time harness
- Temperature sensor
- Panic button
- Magnetic door sensor
- Container security seal cable
- Multi-functional interface cable – Connect your own sensor
- Magnetic and door mount brackets
- Protective cage
- ATEX Cage

### AssetLink Global

AssetLink is a leader in satellite-enabled hardware and IoT systems implementation, design and manufacturing. Building best in class GPS satellite, cellular tracking and sensor-interface hardware, and deliver comprehensive hardware, data services and information access to industrial, Fortune 500 and government clients worldwide. AssetLink connects enterprises with their equipment and assets, no matter how remote. AssetLink is focused on partnering with VARs, Resellers, and Integrators to distribute the "Forever, Everywhere" AssetPack (AP) global tracker.
